An intricate engraving of Venice from 1500, showing a dense urban landscape with numerous buildings, streets, and a large canal filled with ships. The scene is viewed from an elevated perspective, looking down onto the city. The architecture is detailed, with many windows and varied rooflines. In the foreground, several large sailing ships with multiple masts are docked or moving through the water. The overall style is characteristic of the Northern Renaissance, with fine lines and a high level of detail.
